

AHMAD ALBAWAB

Junior SOC Analyst | Blue Team Security

Amman, Jordan | +962 799 415 917 | ahmadalbawab78@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity graduate and aspiring Junior SOC Analyst with a solid foundation in network security, intrusion detection, and vulnerability assessment. Familiar with Blue Team operations including alert monitoring, log analysis, and basic incident investigation. Hands-on experience with Suricata, Wireshark, OpenVAS, and ELK Stack through academic projects and a professional internship. Committed to contributing to security operations teams and continuously developing technical skills in line with industry best practices.

EDUCATION

B.Sc. in Cybersecurity | World Islamic Sciences & Education University (WISE), Amman, Jordan 2021 – 2025

EXPERIENCE

DevOps / Security Intern | Vardot, Amman, Jordan Apr 2025 – Jun 2025

- Monitored and explored log management workflows using the ELK Stack (Elasticsearch, Logstash, Kibana), gaining practical exposure relevant to SIEM operations.
- Operated in Linux environments, practicing command-line navigation, file permissions management, and system administration tasks.
- Developed self-directed research habits and strengthened understanding of infrastructure monitoring concepts in a professional DevOps setting.

PROJECT

Secure Chat Application – Graduation Project (2025)

Developed a high-security real-time chat platform with a client-server architecture, emphasizing data confidentiality and strong authentication. Key security features include:

- End-to-end encrypted messaging using AES-GCM; all communications secured via TLS to prevent interception.
- Multi-factor authentication (MFA): password + USB hardware token for users; OTP-based access for administrators.
- Additional features: encrypted file sharing, steganography, secure file shredding, and text encryption/decryption utilities.

CERTIFICATIONS & TRAINING

-
- **CompTIA Security+** – Studied – foundational cybersecurity: threats, cryptography, identity & risk management
 - **Linux Journey** – Linux fundamentals: system navigation, file management, permissions, basic administration

SKILLS

Cybersecurity: Security Monitoring, Intrusion Detection, Vulnerability Assessment, Incident Investigation, Log Analysis

Tools: Suricata, Wireshark, OpenVAS, ELK Stack (Elasticsearch, Logstash, Kibana), Nmap, Linux CLI

Blue Team / SOC: Alert triage, network traffic analysis, SIEM concepts, threat identification

Cryptography: AES-GCM, TLS/SSL, MFA, OTP, steganography, secure file handling

Soft Skills: Analytical thinking, self-directed learning, technical documentation, teamwork
